

NNClassifier::predictOrientation

NNClassifier::testingOrientation

Data::getO

```
graph LR; A[NNClassifier::predictOrientation] --> D[Data::getO]; B[NNClassifier::testingOrientation] --> D;
```

The diagram illustrates a dependency or data flow. On the left, two white rectangular boxes with black borders are stacked vertically. The top box contains the text 'NNClassifier::predictOrientation' and the bottom box contains 'NNClassifier::testingOrientation'. On the right, there is a gray rectangular box with a black border containing the text 'Data::getO'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both methods depend on or access the 'Data::getO' resource.
