

NNClassifier::predictOrientation

NNClassifier::testingOrientation

NNClassifier::nearestNeighbour

```
graph LR; A[NNClassifier::predictOrientation] --> C[NNClassifier::nearestNeighbour]; B[NNClassifier::testingOrientation] --> C; C --> C;
```

The diagram illustrates a call graph where two methods, `NNClassifier::predictOrientation` and `NNClassifier::testingOrientation`, both call the `NNClassifier::nearestNeighbour` method. The `NNClassifier::nearestNeighbour` method is highlighted in grey and includes a self-loop arrow, indicating it calls itself.
